<sup>(1)</sup> EBITDA = EBIT + Depreciation + Impairment + Provisions

The strong growth witnessed during Q1 2017 accelerated in the second quarter. EBITDA grew by 168% in H1, reaching HRK 1,398 million for the period, while net profit exceeded HRK 850 million, the best H1 result since 2011. Although Exploration & Production remained the main contributor to the results, Refining & Marketing incl. Retail saw the biggest improvement in its performance indicators.

For Exploration & Production, a more favourable external environment managed to offset a 4% decrease in production, resulting in 26% higher EBITDA compared to H1 2016. Refining & Marketing incl. Retail benefited from a period of favourable crack spreads, which alongside higher processing levels (+34%) and strong Retail performance pushed EBITDA excluding special items into positive territory, reaching HRK 183 million for the first half year. Retail sales in both the fuel and non-fuel segments showed a record increase. The continued period of favourable environment will be used for further efficiency measures in order to eliminate cash losses of the business.

CAPEX amounted to HRK 520 million, impacted by different schedule of investments within a year, where a more intensive investment campaign is expected in the second half of 2017. Net debt decreased to HRK 2,026 million with gearing going to historically low level of 15.3%.

<sup>(2)</sup> In H1 2017, EBITDA was positively impacted by HRK 18 mn of retranslation related to Angola, while EBIT was positively influenced by HRK 253 million special items related to both retranslation and reversal of provision in Angola

<sup>(3)</sup> Simplified free cash flow = CCS EBITDA excluding special items - capital expenditures

<sup>(4)</sup> In converting HRK figures into US Dollars, the following average CNB (HNB) rates were used: for Q2 2016 – 6.6386 HRK/USD; Q2 2017 – 6.7576 HRK/USD; H1 2016 – 6.7740 HRK/USD; H1 2017 – 6.8893 HRK/USD; as at Dec 31, 2016 – 7.1685 HRK/USD; as at Jun 30, 2016 – 6.7915 HRK/USD; as at Jun 30, 2017 – 6.4902 HRK/USD

### Commenting on the results, Mr. Zoltán Áldott, President of the Management Board said:

H1 2017 showed a respectable growth for INA results across all business operations. All main indicators are improved with EBITDA increasing from HRK 521 mn in H1 2016 to HRK 1.398 mn in H1 2017 while net profit, excluding one off items, jumped to HRK 608 mn from HRK 23 mn in H1 2016.

2016 efficiency program continued to show visible results in 2017 while favourable external environment brought additional relief. Combined, it led to the lowest indebtedness in the last decade and the ability of INA to finance all main strategic projects in forthcoming period.

Upstream results benefited from the improved external environment with modest growth of Brent and gas prices, while natural decline was slowed down by successful growth projects: EOR project and higher production from new wells Selec and Đeletovci Zapad. Combined with the efficiency program it led to the improved financial result.

Still, Upstream growth was surpassed by Downstream improvements. Significantly higher R&M processing levels further supported by more favourable margins drove the Downstream result to a positive area in EBITDA terms, but the cash flow still stays negative.

Retail maintains good results with regional network growth together with non-fuel expansion assuring constantly strong results.

It is worth to mention stabilized performance of our oil services activities, which were strongest hit by halved Brent prices in the past several years. Crosco reported positive EBITDA in H1 2017.

This relief period should also be used for further strengthening of the market position and operations, as long term outlook is difficult to make and the volatility of the market can once again prove challenging.

#### H1 2017 vs. H1 2016

# KEY DRIVERS

- 30% higher Brent price; positive effect on oil and condensate sales revenues in the amount of HRK 266 million
- HRK (73) million lower natural gas revenues caused by lower realised gas prices
- Domestic crude oil production is at 2016 levels mainly due to:
  - positive effect of full field optimization and EOR projects
  - higher production from new wells Selec and Đeletovci Zapad
  - natural decline and pipeline constraints on Hrastilnica field
- International crude oil production lower by 0.8 mboepd due to:

  - natural production decline on all Egypt concessions
  - natural production decline and technical issues on Block 3/05 in Angola
- Natural gas production lower driven by:
  - 14% lower offshore natural gas production due to natural decline and water cut
  - 6% higher onshore natural gas production mainly as a result of production startup from Međimurje fields
- Lower domestic condensate production (4%) as a consequence of lower well performance

#### CAPITAL EXPENDITURES

E&P CAPEX H1 2017 (HRK million)	Croatia	Egypt	Angola
Exploration	1.3	-	-
Development	180.5	7.0	0.2
Other	70.2	-	-
Total	252.0	7.0	0.2

- Lower investment level as a result of lower Croatia Onshore activities and lower development in Angola and Egypt
- Drava-02 exploration program Preparatory activities for drilling program in 2017 are in progress
- 3D seismic survey and additional development of Bokšić-Klokočevci Field 3D seismic recording completed on June 25th
- Additional development Žutica Well workovers finished on 10 wells, 7 of which are put in production
- Well Stimulation Campaign Phase II performed stimulations on 17 wells, out of which 9 were put in production up to date

<sup>\*\*</sup> In H1 2017, EBITDA was positively impacted by HRK 18 mn of retranslation related to Angola, while EBIT was positively influenced by HRK 253 million special items related to both retranslation and reversal of provision in Angola \*\*\* Simplified free cash flow = EBITDA excluding special items - capital expenditures

#### H1 2017 vs. H1 2016

#### KEY DRIVERS

- Favourable external environment, mainly driven by stable DTD Brent price around 50 USD/bbl, higher diesel crack spreads (+13 USD/t vs H1 2016), and more favourable, less negative fuel oil spread which had a direct positive impact on refining margins
- Increased total sales volumes on the back of higher sales on both captive markets (+80kt) and other export markets (+268kt)
- Higher refining margins and sales demand resulted in higher processing level in refineries (+463kt), operating without major disturbances while capturing both margin drivers
- Total retail sales volumes reached 473kt (+9% vs H1 2016), mostly driven by network expansion with Energopetrol consolidation
  and further assissted with active sales of Class PLUS fuel (introduced in Q2 2017). Introduction of RON 100 Gasoline produced
  in the INA refining system.
- Non-fuel margin increased on the back of continuous investment and development activities in goods segment, contributing 21% to total Retail margin
- Following the Sisak Refinery last year negative free cash flow in the amount of HRK (194) million, Sisak Refinery accounts for further creation of negative cash losses in the amount of HRK (113) million in H1 2017. Last year Sisak Refinery realized operating loss amounting HRK (264) million, trend of which continued further in H1 2017 with operating loss of HRK (146) million, negatively impacting the INA group result.

#### CAPITAL EXPENDITURES

- Lower CAPEX level in H1 2017 mainly driven by the Rijeka Refinery turnaround executed during Q1 2016
- Refining and Marketing capital expenditures in H1 2017 amounted to HRK 205 mn
  - Continued investment activities in logistics and refinery development projects
  - On-going activities on FEED phase for the Residue upgrade investment in the Rijeka Refinery, together with site preparation activities. Preparation of the main design for the coke port has been finalised
- Retail capital expenditures in H1 2017 amounted to HRK 39 mn
  - Various investments projects including highway greenfield constructions, service station reconstructions, modernizations and other improvement projects
  - Multiple projects on expanding the non-fuel offer in line with the "Fresh corner" concept have been executed, are ongoing or in preparation, incl. cafe bar, car wash or shop modernization

## Intersegment profit eliminations

Intersegment transfer represents the effect of unrealized profit arising in respect of transfers of inventories from Exploration and Production to Refining and Marketing. Through intersegment transfer unrealized profit is eliminated (difference between transfer price and cost of domestic crude). For segmental reporting purposes the transferor segment records a profit immediately at the point of transfer. However, at the company level profit is only reported when the related third party sale has taken place. Intersegment EBITDA effect on results in H1 2017 is HRK -8 million which is lower compared to HRK -86 million in H1 2016 due to different schedule of domestic crude processing.

# Financial overview and notes INCOME STATEMENT

#### Notes H1 2017 RESULTS

- Total sales revenues in H1 2017 amounted to HRK 8,410 million and were 34% above H1 2016 level, triggered by both Exploration and production and Refining & marketing including Retail sales revenue increase as a result of the improved price environment together with higher processing level and retail network expansion activities.
- 2 Costs of raw materials and consumables were 55% above H1 2016 level at HRK 4,197 million, resulting from higher crude prices and higher processing in both refineries.
- Costs of goods sold in H1 2017 recorded an increase of 14% compared to H1 2016, and amounted to HRK 1,438 million resulting from different sales structure.
- 4 Other **operating costs** realized in H1 2017 include:
  - Other material costs were lower by 11% and amounted to HRK 854 million resulting from lower subcontractors costs related to STSI project in Belarus.
  - Service costs in the amount of HRK 238 million recorded a decrease of 32% mainly due to absence of additional profit oil tax in Angola paid in H1 2016 and lower VAT related expenses.
  - Depreciation in the amount of HRK 877 million was 8% higher compared to H1 2016.
  - Value adjustments and provisions had a positive effect in the amount of HRK 389 million and were HRK 63 million higher compared to H1 2016, mainly due to positive impact of reversal of provisions related to Angola, partly offset by released employee related provisions related to establishment of INA Maloprodajni servisi and released litigation provisions in Holdina in H1 2016.
- 5 Staff costs in the amount HRK 835 million were 27% lower compared to H1 2016, mainly due to lower severance payments.
- Income tax expense in H1 2017 amounted to HRK 178 million and was HRK 141 million higher than in H1 2016. Tax costs and deferred taxes during the interim period are calculated on the basis of actual results and the profit tax rate, 20% for the periods ended 30 June 2016 and the profit tax rate, 18% for the periods ended 30 June 2017.
- Net financial result is positive in H1 2017 and significantly higher compared to H1 2016 mainly as a result of
  - Net foreign exchange profit was HRK 206 million in H1 2017 while in H1 2016 net foreign exchange profit was HRK 72 million.
  - Interest payable amounted to HRK 39 million and interests received to HRK 1 million in H1 2017 while in H1 2016 interest
    payables amounted to HRK 36 million and interests received to HRK 14 million, reflecting court cases which offset lower
    interest cost.
  - Other financial net expenses amounted to HRK 28 million, and are lower compared to HRK 24 million in H1 2016.

In addition to international accounting standards, international reporting standards and regulatory requests the company discloses special items to achieve a higher level of transparency and to provide better understanding of the usual business operations. Business events not occurring regularly and having significant effect on operations and results are considered as special items. INA has adopted the materiality level for the special items in the amount of USD 10 million or above. In H1 2017, the result was materially impacted by Agreement between Angola Ministry of Finance and INA regarding the settlement of the Additional tax and Profit Oil in Angolan Blocks for previous periods. If special items reaches materiality level on cumulative basis, previous quarters are restated.

Furthermore, in accordance with the adopted accounting policies and IFRS 36 – Impairment of Assets, INA performs impairment testing at the end of each reporting period if impairment indicators are assessed to be significant.

# Financial instruments and risk management

Risk Management procedures of INA Group are described in detail in INA's Consolidated and separate Financial Statements for the year ended 31 December 2016.

As of 30 June 2017 INA had:

- opened short-term forward commodity swap transactions to hedge its exposure to changes in pricing periods, inventory levels and refinery margins
- contracted and available short-term credit lines amounting to HRK 2.28 bn excluding overdrafts and trade financing
  credit lines established with the purpose to finance the purchase of crude oil and oil products and
- contracted and available long-term credit lines amounting to HRK 2.91 bn.

# Related party transactions

INA Group has dominant positions in Croatia in oil and gas exploration and production, oil refining and the sale of gas and petroleum products. As a result of the INA Group strategic position within the Croatian economy, a substantial portion of its business and the business of its subsidiaries is transacted with the Croatian Government, its departments and agencies, and the companies with the Republic of Croatia being their majority shareholder. Transactions between INA, d.d. and its subsidiaries, which are related parties of the Company, have been eliminated on Group level consolidation. During the 2017 and 2016, INA Group entered into the following trading transactions with the following related parties:

INA-Group	Sales of goods	Purchase of goods
