<sup>\*</sup> Related to Revenue from contracts with customers

INA Group increased its revenues in H1 2018 by 13% to HRK 9,495 million, mainly driven by higher sales focused on utilising higher crude oil and product prices, which were partially offset by slightly lower Upstream production volumes. Total CCS EBITDA decreased by 14% year-on-year and amounted to HRK 1,328 million on lower Refining and Marketing including Retail contribution, yet operating cash flow strengthened by 22% to HRK 1,197 million in H1 2018.

Exploration and Production EBITDA excluding special items grew by 6% to HRK 1,478 million, driven by materially higher realized hydrocarbon price (+33% year-on-year in USD terms and +20% in HRK terms), which was, mostly offset by a 7% drop in hydrocarbon production. CCS EBITDA of Refining and Marketing incl. Retail in H1 2018 amounted to HRK 91 million, while the negative free cash flow widened, affected by the less favorable external environment. Planned maintenance activities in Q1 2018 impacted processing level in refining, retail fuel sales moderately improved together with the non-fuel sales which continued to grow.

CAPEX was at the level of the same period of 2017 and amounted to HRK 518 million with a continued focus on Croatian investments. At the same time net debt decreased further to HRK 701 million at the end of H1 2018, while net gearing dropped below 6%.

<sup>&</sup>lt;sup>(2)</sup> No significant one-off items in H1 2018, while H1 2017 Operating profit and EBITDA were positively impacted by HRK 253 mln of special items related to both retranslation and reversal of provision in Appela

<sup>(3)</sup> Simplified free cash flow = CCS EBITDA excluding special items - capital expenditures

<sup>(4)</sup> In converting HRK figures into US Dollars, the following average CNB (HNB) rates were used: for Q2 2017 – 6.7576 HRK/USD; Q2 2018 – 6.1959 HRK/USD; H1 2017 – 6.8893 HRK/USD; H1 2018 – 6.1222 HRK/USD as at Dec 31, 2017 – 6.2697 HRK/USD; as at Jun 30, 2017 – 6.4902 HRK/USD; as at Jun 30, 2018 – 6.3150 HRK/USD

Commenting on the results, Mr. Sándor Fasimon, President of the Management Board said:

H1 2018 showed as a positive period for overall INA results. Combination of higher sales and utilization of favorable Upstream environment helped to keep the revenues on a high level.

Domestic crude oil production continues to grow, thanks to the ongoing activities in the EOR project and additional development projects, moderating the natural decline in the gas production, expected with the mature portfolio. Finalization of our transaction with ENI for the North Adriatic concession areas will also play its role in arresting the production decline in the years to come.

Refining volumes are in line with the regular, planned maintenance activities, somewhat lower compared to comparable period 2017, but great effort is given in making the operations more sustainable. Crude basket is constantly expanded and more favorable crude types are processed.

Moderate Retail growth is in line with the seasonal movements, while constant expansion of non-fuel related services stays our priority for the upcoming period.

This relief period in the form of rather favorable external environment, at least for Upstream operations, should also be used for further streamlining of the operations and strengthening of our market position, as the volatility of the market can once again prove challenging.

#### H1 2018 vs. H1 2017

#### KEY DRIVERS

- Higher DTD Brent price (increase from 52 USD/bbl to 71 USD/bbl) and less favorable external environment with lower gasoline (-5 USD/t) and fuel oil (-50 USD/t) crack spreads, partially mitigated by higher diesel (+16 USD/t) crack spread
- Lower total sales volumes on captive markets (-5 kt) and higher on other export markets (+35 kt) supported by stable sales margins
- Planned maintenance activities in the refineries resulted in lower processing level (-90 kt), with continued utilisation of extended crude basket, focusing on higher financial benefits of heavier crude oil types processed during H1 2018
- Total retail sales volumes at 483 kt moderately improved, with a significant contribution of the network in Bosnia and Herzegovina.
   Higher realization in Croatia was supported by active sales of Class PLUS fuels and RON 100 Gasoline
- Non-fuel margin increased by 8% and non-fuel contributed 52% of the total Retail margin growth compared to last year period due to the continuous expansion in goods with Fresh Corner concept implementation and development of new non-fuel related services

#### CAPITAL EXPENDITURES

- Refining and Marketing capital expenditures amounted to HRK 172 million
  - Engineering Procurement and Construction tender for Residue Upgrade Project. Preparation of Front-End engineering design for all units done. Main designs preparation in final stage.
  - Contract for Engineering Procurement and Construction signed, Long Lead Items contracted and Building Permit issued for the Propane-propylene Splitter project. Civil preparation works on locations finished.
  - Continued investment activities in logistics and refinery development projects with special focus on environmental related projects and upcoming Rijeka Refinery projects
- Retail capital expenditures in H1 2018 amounted to HRK 62 million compared to HRK 39 million in H1 2017
  - Several investments projects including greenfield constructions, acquisitions, service station reconstructions, modernizations and other improvement projects
  - Multiple projects on expanding the non-fuel offer in line with the "Fresh corner" concept
