<sup>(1)</sup> EBITDA = EBIT + Depreciation + Impairment + Provisions

INA results continued to improve quarter on quarter during 2016, although they still remain lower compared to the 2015 level. Nevertheless, having in mind that the realized hydrocarbon price decreased by 27% compared to the first nine months 2015, net profit decrease of just 10% is stable result in the current environment.

Upstream production remains the main cash generator, as oil production increased 11%, compensating for the natural decline in gas production, mainly offshore. The general overhaul of Gas Treatment Plant Molve contributed to the temporal onshore decline in Q3, but this will be offset by production start-up on the new Međimurje fields.

<sup>&</sup>lt;sup>[2]</sup> The Q1-Q3 2016 EBITDA was negatively influenced by HRK 281 million special items related to severance payments, while Q1-Q3 2016 EBIT was additionally negatively influenced by HRK 133 mn of impairment of Zagreb-1 drilling rig

<sup>(</sup>a) In converting HRK figures into US Dollars, the following average CNB (HNB) rates were used: for Q3 2016 – 6.7064 HRK/USD; Q2 2016 – 6.6386 HRK/USD; Q3 2015 – 6.8049 HRK/USD; Q1-Q3 2015 – 6.8285 HRK/USD; Q1-Q3 2016 – 6.7511 HRK/USD; as at September 30, 2016 – 6.6962 HRK/USD; as at June 30, 2016 – 6.7915 HRK/USD; as at September 30, 2015 – 6.7931 HRK/USD

<sup>\*</sup> Restatement of comparable previous periods was made – see on page 12

Refining and Marketing continues to operate in a somewhat less supportive environment, as average crack spreads almost halved compared to the corresponding period of last year. Nevertheless, CCS based operative result of Refining and Marketing (including Retail) improved significantly, amounting to HRK (37) million. Sales on the regional market increased, with Slovenia leading the way with 14% a increase compared to first nine months of 2015.

The overall result was impacted by special items related to severance payments, which amounted to HRK 281 million on EBITDA level, primarily caused by the new operating model of Retail. Additionally, EBIT was negatively influenced by a HRK 133 million impairment of Zagreb-1 drilling rig. Despite 26% lower revenues, the financial position of the Company remains stable, with net debt and gearing ratio during the Q1-Q3 2016 period reaching HRK 3,096 million and 22.4% respectively. This was achieved through an approximately HRK 1 billion savings initiative across all Segments, which will successfully mitigate the unfavourable external environment impact by the end of the year.

CAPEX reached HRK 968 million and despite the highly challenging external environment, met the Q1-Q3 2015 level. In addition to regular business projects, INA invested in acquisition of Energopetrol, holding now management control in the company and adding value to its Retail operations.

- ▶ Exploration and Production: In Q1-Q3 2016, EBITDA excl. special items reached HRK 1,602 million, representing a decrease of HRK 888 million compared to the same period last year. The negative impact was primarily driven by lower Brent and natural gas prices which decreased as a consequence of reduced regulated gas price for households, but also due to intensification of market competition further pushing down prices. A production decrease of 1.5 mboepd was driven by shrinking off-shore contribution as well as scheduled Molve overhaul.
- ▶ Refining and Marketing (including Retail): Q1-Q3 2016 CCS EBITDA excl. special items amounted to HRK 184 million while reported EBITDA amounted to HRK (10) million. The result was impacted by external environment trends alongside internal company efforts focused on OPEX saving initiatives, diversification of crude oil portfolio, but partially negatively affected by deteriorated unit sales margins. The result was further supported by positive retail performance including the non-fuel segment.
- ➤ Corporate and Other¹: EBITDA excl. special items of the segment amounted to HRK (185) million, a decrease compared to Q1-Q3 2015 level by HRK 152 million. EBITDA was lower mainly due to the negative contribution of Crosco, caused by significantly lower engagement of drilling platforms and the unfavourable external environment for service companies.

### Commenting on the results, Mr. Zoltán Áldott, President of the Management Board said:

INA delivered strong results in Q3 2016 with EBITDA excluding special items amounting to HRK 845 million, which is a 16% increase over the same period last year despite a still challenging external environment.

In the first nine months of 2016 net profit excluding special items amounted to HRK 457 million, in line with the comparable period last year. Our savings initiative which started in Q1 2016 ensured the company's stabile financial position with gearing of 22% and enabled CAPEX delivery of almost HRK 1 billion, in line with 2015.

Domestic crude production keeps growing, by 15% compared to the same period last year. Refined product sales are at last year's level, with even some increase on regional markets. Acquisition of Energopetrol added new value to the company's Retail operations.

In a weak oil and gas environment with modest refinery margins, a cautious approach in regards to new investments and operative costs stays imperative. Although the financial position has significantly improved compared to previous years, it still requires attention from the management. Still, we are continuing with preparations and investments necessary for the Residue Upgrade Program in Rijeka Refinery, INA's largest single domestic investment and one of the largest in Croatia ever.

#### Q1-Q3 2016 vs. Q1-Q3 2015

In Q1-Q3 2016, Exploration and Production EBITDA excl. special items reached HRK 1,602 million, a decrease of 36% compared to Q1-Q3 2015 was mainly a result of lower Brent and natural gas prices. Total hydrocarbon production reached 39.3 mboe per day, a decrease of 1.5 mboe per day compared to Q1-Q3 2015 due to lower production of natural gas, mainly on offshore, as well as Molve plant regular overhaul. The decline was partially mitigated by higher domestic crude oil production following well optimisation and workovers, as well as slightly higher Egyptian production. In addition to lower revenues, operating profit of HRK 901 million was negatively impacted by HRK (66) million of Egyptian receivables' impairment.

Compared to the same period last year, Brent price in Q1-Q3 2016 was 24% lower and had a negative impact on crude oil sales revenues in the amount of HRK (366) million. Lower realised natural gas prices, as a consequence of further reduction in the regulated gas price from April 2016 and adverse market environment caused additional HRK (509) million negative effect compared to the previous year, of which HRK (103) million related to the reduction in the regulated gas price.

Crude oil production in Q1-Q3 2016 increased by 11% compared to the same period last year as a result of:

- Domestic crude oil production increase by 15% on the back of well workovers and optimisations together with production from new wells Selec and Đeletovci Zapad
- Oil production in Egypt was 3% higher as a result of improved performance on the North Bahariya and East Yidma concessions, while lower well performance on Block 3/05 in Angola resulted in a 12% production decline.

Natural gas production in Q1-Q3 2016 was 12% lower than in Q1-Q3 2015 manly resulting from:

- Offshore natural gas production decrease of 23%, negatively driven by natural decline, water cuts and lower INA share
- 1% lower Onshore production as a result of performed general overhaul on Gas Treatment Plant Molve and Fractionation Facilities Ivanić Grad in September, partially offset with production start-up on field Vučkovec (within Međimurje project) from July 2016.

Lower domestic **condensate** production (3%) was a result of a general overhaul on Gas Treatment Plant Molve and Fractionation Facilities Ivanić Grad in September.

<sup>\*\*</sup> Restatement of comparable previous periods was made – see on page 12

#### Q3 2016 vs. Q3 2015

In Q3 2016, realised EBITDA excl. special items (HRK 555 million) was 33% lower compared to the corresponding period last year, mostly as a consequence of a 32% decrease in natural gas prices together with lower Brent prices which led to a 24% lower total realised hydrocarbon price. Domestic gas production decreased compared to Q3 2015 due to lower offshore production caused by natural decline and water cut, together with lower onshore natural gas production due to overhaul on Gas Treatment Plant Molve and Fractionation Facilities Ivanić Grad. This negative effect was partially mitigated by higher domestic crude oil production as a result of performed well optimization, workovers, the impact of EOR project and start-up of new wells on Đeletovci Zapad and Selec.

#### Q3 2016 vs. Q2 2016

In Q3 2016, realised EBITDA excl. special items was 11% higher compared to Q2 2016 as a result of slightly higher prices together with lower operating expenditures, partially offset with somewhat lower production due to general overhaul on Gas Treatment Plant Molve and Fractionation Facilities Ivanić Grad.

#### **CAPITAL EXPENDITURES**

Exploration and Production CAPEX in period Q1-Q3 2016 amounted to HRK 526 million. Capital investments in Croatia amounted to HRK 452 million whereas international capital investments reached HRK 75 million during the same period. Capital investments were lower in total by HRK 34 million or 6% compared to Q1-Q3 2015. Lowered investment level was the result of lower development in Angola and Egypt and lower offshore activities.

E&P CAPEX Q1-Q3 2016 (HRK million)	Croatia	Egypt	Angola
Exploration	5	=	=
Development	356	53	22
Other	91	-	-
Total	452	53	22

#### **CAPITAL EXPENDITURES DESCRIPTION**

#### **Croatia- Exploration**

**Drava-02** - The PSA signed on June 10<sup>th</sup> 2016. Preparations for the exploration program in progress.

**Bunjani-2 South well** –Well testing and finished in H1 2016, the temporary suspension of the well has been made. Proposal for well stimulation is being prepared and upon final decision, a well test is planned to be performed in 2017. Hydrocarbon evaluation studies of **Sava & Mura area** are progressing, as the next onshore tender is expected to be launched during H1 2017.

#### Croatia - Development

Ivana K revamping activities – Obtaining a use license for the test exploitation of booster compressor

**Ika JZ -** Test production in progress (extended), concession contract obtained, obtaining a license for the use is in progress **Medimurje project** - Vučkovec field production started in July and trial production on Zebanec field in August. Production is paused during the Gas Treatment Plant Molve overhaul. Vukanovec field start-up delayed due to permiting, planned start-up is January 2017. **EOR project** - Fields Ivanić and Žutica North - trial injection of CO<sub>2</sub> in progress.

Selec-3 well – Drilling finished in March, production expected during 2018 due to permiting.

Wells General Workovers - 27 well workovers performed Q1-Q3 2016.

Mol-35R well - Re-entry well drilled to accelerate the production dynamics of Molve field; started producing in June.

**US Turnaround:** The bi-annual overhaul of surface facilities on Gas Treatment Plant Molve and fields located in the Northern Croatia Production Region, as well as the Fracking Facility Ivanić Grad was completed successfully in Q3 2016.

#### Egypt

**North Bahariya** – two development wells drilled and four wells converted to water injectors. Two water source wells drilled in August – September 2016. Workover operations were successfully completed on five wells.

Ras Qattara - small Project's activities were performed (upgrading Zarif and Faras process, overhauling facilities and civil works)

West Abu El Gharadig – small Project's activities were performed (upgrading Raml process and civil works)

Sidi Rahman - Work program for 2016 is restricted to minimum activities necessary to maintain production.

#### Angola

**Block 3/05** - Production start-up on well Bufalo-113 and water injector on well Bufalo-110. Bufalo-113 infill well under testing. Decision on way forward pending. Well perforating/acidizing across several fields, Cobo-Pambi reservoir model, ESP (electric submersible pump) pilot project on two Palanca field wells; Facilities maintenance on PAL, PAC and COB fields

**Block 3/05A -** On the well Gazela-101 ST-1 post-drilling studies in progress. Caco-Gazela Development Area: Final Investment Decision postponed to the following quarter. Punja development area: Waiting for National Concessionaire's reply to Contractor Group's proposal for fiscal enhancement. Final Investment Decision postponed to following quarter.

#### Q1-Q3 2016 vs. Q1-Q3 2015

In Q1-Q3 2016, Refining and Marketing (including Retail) CCS-based EBITDA excl. special items amounted to HRK 184 million, a HRK 101 million decrease compared to Q1-Q3 2015 while reported EBITDA result amounted to HRK (10) million, an increase of HRK 359 million compared to the same period of last year.

#### Refining & Marketing operations

The difference in reported result was mainly driven by 1) lower DTD Brent price (decrease from USD 55 USD/bbl to USD 42/bbl), 2) slightly less favourable refining margin environment and 3) higher sales on captive market. The trend was additionally supported by 4) lower fixed OPEX as a result of on-going efficiency efforts, also visible on lower energy costs. Additionally, the result was negatively affected by lower export sales volumes with a decrease in sales margins.

Total wholesale volumes were 2.694 kt, aligned with the same period in 2015 (-18 kt), also keeping strong position on motor fuel domestic market sales volumes, with stable gasoline volumes (-0.6 kt) and 7% increase in diesel sales volumes (+19 kt). Strong supply competition on B&H market continued from last year, resulting with -1.6% (-5 kt) decrease on total motor fuel volumes, primarily gasoline (-4 kt). Total sales were further supported by higher total heating oil (+6 kt) and fuel oil (+37 kt) sales, mainly focusing on other export markets.

#### Retail operations

Total retail sales volumes (included 19 kt of Energopetrol) in Q1-Q3 2016 were 767 kt, a 1% increase vs. Q1-Q3 2015. Starting from 1st of July 2016, Energopetrol was integrated to INA Group Retail segment. The increase was mainly driven by higher sales of diesel and heating oil by 2% (11kt) in correlation with market demand increase, while sales of motor gasoline is in a continuous decline by 1% (3kt).

Throughput per site in Q1-Q3 2016 was 2% lower compared to the same period of the previous year. Non-fuel margin revenue increased on the back of continuous expansion in goods along with the development of new non-fuel related services.

On 30 September 2016, INA Group operated a network of 495 Retail sites (387 in Croatia, 101 in Bosnia and Herzegovina (45 in Holdina and 56 in Energopetrol), 6 in Slovenia and 1 in Montenegro), of which 60 Retail sites in Croatia were included in the Entrepreneurship model.

#### Q3 2016 vs. Q3 2015

In Q3 2016, Refining and Marketing (including Retail) realised a higher CCS-based EBITDA by HRK 38 million compared to the same period last year.

The result was positively impacted by 1) lower Brent price together with higher processing level, 2) increased overall market demand, 3) higher sales volumes on captive and export markets, and 4) lower fixed OPEX level. The results were partially negatively impacted by lower level of products crack spreads together with lower unit sales margins.

#### Q3 2016 vs. Q2 2016

In Q3 2016 Refining and Marketing (including Retail) realised higher CCS-based EBITDA result by HRK 315 million compared to the previous quarter.

The result was mainly impacted by 1) a continued favourable external environment, additionally supported with 2) stable refinery operations with higher processing levels together with 3) higher motor fuel sales volume in line with seasonal market patterns and 4) lower fixed OPEX. The result was negatively offset by 5) lower level of products crack spreads.

#### **CAPITAL EXPENDITURES**

Total capital expenditures were HRK 422 million in Q1-Q3 2016, HRK 148 million higher compared to same period last year. Refining and Marketing capital expenditures reached HRK 335 million, primarily driven by maintenance, compliance and investment type projects implemented until Q3 2016 during Rijeka Refinery turnaround, together with continued investment activities in logistics development projects and equipment purchasing. Retail capital expenditures reached HRK 87 million, HRK 22 million increase compared to Q1-Q3 2015. Retail in Croatia and Bosnia and Herzegovina completed two highway Greenfield constructions, seven reconstructions, 14 modernizations, and multiple projects on expanding non-fuel offer in line with "Fresh corner" concept.

Sales data include intra-group sales and related costs are included in the operating costs of the business segment making the purchase. Intra-group transactions are eliminated for consolidated sales data and operating costs.

## Financial overview and notes INCOME STATEMENT

#### Notes Q1-Q3 2016 RESULTS

- Total sales revenues in Q1-Q3 2016 amounted to HRK 11,013 million and were 26% below Q1-Q3 2015 level, primarily triggered by lower Brent and less favourable refining margin environment together with lower hydrocarbon production, in both Exploration and Production and Refining and Marketing Segments.
- Costs of raw materials and consumables were 28% below Q1-Q3 2015 level at HRK 4,913 million, resulting from lower prices and lower processing.
- 3 Costs of goods sold in Q1-Q3 2016 recorded a decrease of 24% compared to Q1-Q3 2015, and amounted to HRK 1,741 million resulting mainly from different sales structure.
- Other **operating costs** realized in Q1-Q3 2016 include:
  - Other material costs amounted to HRK 1,510 million and were lower by 24% resulting from lower Brent impacting E&P royalty, production cost and transportation costs, lower engagement in Crosco and lower subcontractors costs related to STSI project in Belarus.
  - Service costs in the amount of HRK 482 million recorded a 6% decrease mainly due to lower Crosco engagement and ENI
    tax not charged in Q1-Q3 2016 as a result of agreement with Ministry of Finance, both partly offset by additional profit oil
    tax in Angola.
  - Depreciation in the amount of HRK 1,232 million was 1% lower compared to Q1-Q3 2015.
  - Adjustments and provisions had a positive effect in the amount of HRK 324 million and were HRK 440 million higher compared to Q1-Q3 2015 resulting from released employee related provisions connected to establishment of INA Maloprodajni servisi and released litigation provisions in Holdina together with release of provision related to additional profit oil tax in Angola.
- Staff costs in the amount HRK 1,657 million were 9% lower compared to Q1-Q3 2015. Staff cost represents cost of net salaries in the amount of HRK 778 million, cost of tax and contributions for pension and health insurance in the amount of HRK 562 million, non-taxable severance payments for employees whose employment contracts are terminated due to business reasons in net amount of HRK 194 million and other payroll related costs in the amount of HRK 124 million for the period ended 30 September 2016. For the period ended 30 September 2015 staff cost includes cost of net salaries in the amount of HRK 908 million, cost of tax and contributions for pension and health insurance in the amount HRK 631 million, non-taxable severance payments for employees whose employment contracts are terminated due to business reasons in net amount of HRK 107 million and other payroll related costs in the amount HRK 167 million
- 6 Income tax expense in Q1-Q3 2016 amounted to HRK 93 million compared to HRK 134 in Q1-Q3 2015. Tax costs and deferred taxes during the interim period are calculated on the basis of actual results and the profit tax rate, 20% for the periods ended 30 September 2016 and 30 September 2015.
- 7 Net financial result is positive in Q1-Q3 2016 compared to loss recorded in Q1-Q3 2015 mainly as a result of forex differences.
  - Net foreign exchange profit reached HRK 99 million in Q1-Q3 2016, while in Q1-Q3 2015 net foreign exchange loss amounted to HRK 106 million.
  - Interest payable amounted to HRK 58 million and interests received to HRK 15 million in Q1-Q3 2016, while in Q1-Q3 2015 interest payables amounted to HRK 117 million and interests received to HRK 22 million.
  - Other financial net expenses amounted to HRK 20 million, and are lower compared to HRK 88 million in Q1-Q3 2015.

#### Restatement

\*A change has been made in the recording of "Financial income and expenses": "Realized and unrealized loss of fair value hedge transactions"; "Negative unrealized FV of hedged items"; "Realized and unrealized gain of fair value hedge transactions"; "Positive unrealized FV of hedged items" are now recorded in "Other Income".

#### Special items

In addition to international accounting standards, international reporting standards and regulatory requests the company discloses special items to achieve a higher level of transparency and to provide better understanding of the usual business operations. Business events not occurring regularly and having significant effect on operations and results are considered as special items. INA has adopted the materiality level for the special items in the amount of USD 10 million or above. If special items reaches materiality level on cumulative basis, previous quarters are restated. Furthermore, in accordance with the adopted accounting policies and IFRS 36 – Impairment of Assets, INA performs impairment testing at the end of each reporting period if impairment indicators are assessed to be significant.

#### Intersegment eliminations

Intersegment elimination line within the operating results is used to provide segmental results as International Accounting Standards requests, guided with the transparency of presented information which needs to fulfil the highest requests of consistency and reliability. For this purpose and also for the purpose of having the segmental results presenting fair market relations between the segments, which are fully aligned with on demand operations of the Refining and Marketing including Retail segment, parity of internal transfer between Exploration and production and Refining and Marketing including Retail is based on delivered quantities. This line shows the effect of the change on operating profit in the amount of unrealized profit deferred in respect of transfers between segments. Unrealized profits arise where the item transferred is held in inventory by the receiving segment and a third party sale takes place only in a subsequent quarter. For segmental reporting purposes the deliverer segment records a profit immediately at the point of transfer. However, at company level profit is only reported when the related third party sale has taken place. Intersegment EBITDA effect on results in Q1-Q3 2016 is HRK -42 million which is lower compared to HRK 127 million in Q1-Q3 2015 due to different operational mode of Sisak refinery.

#### **BALANCE SHEET**

Notes

- 8 As at 30 September 2016 INA Group total assets amounted to HRK 20,263 million and were 1% lower compared to 31 December 2015.
- In the period ended 30 September 2016, INA Group invested HRK 28 million in intangible assets. The effect of depreciation equals HRK 29 million. Foreign exchange revaluation of oil and gas fields decreased net book value in amount of HRK 6 million. Transfer to tangible assets decreased intangible assets in amount of 2 million Emission quotas decreased NBV in amount of HRK 11 million.
- In the period ended 30 September 2016, INA Group invested HRK 940 million in property, plant and equipment. Capitalized decommissioning costs increased the value of assets by HRK 7 million. Foreign exchange revaluation decreased net book value in amount of HRK 79 million. The effect of depreciation reduced net book value of property, plant and equipment in amount of HRK 1,203 million. Write-off of negative vells reduced net book value in amount of HRK 2 million. Disposal of tangible assets equals HRK 27 million. Transfer to merchandizing goods decreased net book value in amount of HRK 1 million. Transfer to tangible assets increased net book value in amount HRK 2 million. By acquirining additional shares of Energopetrol INA, d.d. has gained control over Energopetrol and statrted fully consolidating it which resulted in increase of INA Group assets by HRK 316 million. Other movements, out of which most significant is transfer of platform Zagreb I to assets held for sale which subsequently resulted with impairment in amount of HRK 128 million, in total decreased property, plant and equipment in amount of HRK 146 million.
- 11 **Issued capital** as at 30 September 2016 amounted to HRK 9,000 million. There was no movements in the issued capital of the Company in either the current or the prior financial reporting.
- 12 Inventories amounted to HRK 2,101 million, and have increased by 15% compared to 31 December 2015 as a result of higher crude oil inventories.
- 13 **Trade receivables** decreased to HRK 1,661 million and are 4% lower compared to the opening balance on 31 December 2015 resulting from lower sales revenue.
- As at 30 September 2016 **total liabilities** amounted to HRK 9,557 which is 2% or HRK 240 million lower compared to 31 December 2015. INA Group **net debt** increased by 2% and amounted to HRK 3,096 million compared to 31 December 2015. **Gearing ratio**<sup>2</sup> kept stable and increased from 22.3% as at 31 December 2015, to 22.4% as at 30 September 2016.
- 15 Trade payables increased by 9% to HRK 1,524 million, as a result of higher liabilities for imported crude oil.

#### **CASH FLOW**

Notes

- The operating cash-flow before changes in working capital amounted to HRK 1,336 million in Q1-Q3 2016 representing a decrease of HRK 769 million, or 37%, compared to Q1-Q3 2015, which is in line with change in EBITDA performance compared to the previous year.
- 17 Changes in working capital affected the operating cash flow negatively by HRK 192 million, due to:
  - Increase value of inventories by HRK 276 million due to higher volumes of crude inventories.
  - Increase in receivables by HRK 85 million as a result of higher VAT receivables in Q1-Q3 2016 compared to Q1-Q3 2015
  - Increase in trade and other payables by HRK 169 million as result of higher liabilities for imported crude oil.
- Net outflows in investing activities amounted to HRK 972 million, in comparison with HRK 935 million outflows in Q1-Q3 2015.

 $<sup>^{2}\,</sup>$  Net debt / net debt plus equity incl. minority interests

#### Financial instruments and risk management

Risk Management and Hedging Policy for INA Group is providing the framework under which INA and its consolidated subsidiaries manage and maintain commodity, foreign exchange and interest rate risk at an acceptable level. Beside financial (market) risks, the most important risks are credit risk and liquidity risk.

#### a) Market risk

#### Commodity price risk management (price risk)

INA purchases crude oil and oil products on a spot market in USD, mostly using short-term credit facility arrangements. The required quantities of gas had been purchased in EUR based on spot prices. INA may use derivative instruments in managing its commodity exposure. As of 30 September 2016, INA had opened short-term forward commodity swap transactions to hedge its exposure to changes in pricing periods, inventory levels and fixed price contracts.

#### Foreign currency risk management

Many INA Group's transactions are priced and denominated in foreign currency and thus INA Group is exposed to currency risk. INA Group has net long USD and EUR, and net short HRK exposure of operative cash flow position. INA Group may use cross currency swaps to adjust the currency mix of the debt portfolio. As of 30 September 2016, there were no open cross currency swap transactions.

#### Interest rate risk management

INA Group companies use borrowed funds with floating interest rates and consequently INA Group is exposed to the interest rate risk. INA Group does not speculate on interest rate developments and generally chooses floating rates. INA Group may use interest rate swap to manage interest rate risk. As of 30 September 2016, there were no open interest rate swap transactions.

#### Other price risk

INA is exposed to equity price risks arising from equity investments held for strategic reasons and not for trading.

#### b) Credit risk

Sales of goods and services with deferred payment create credit risk, a risk of non-payment and risk that the counterparty will default on its contractual obligations. According to "Customer Credit Management Procedure" creditworthiness and risk in dealing with customers is estimated based on internal credit assessment model as well as on the services provided by credit rating agencies. There is no significant credit risk exposure of INA Group that is not covered with payment security instruments, other than those to the institutions and entities controlled by the state and the local government, and exposure toward customers under certain concession agreements abroad. In order to minimize credit risk, INA is using credit risk insurance services. INA, to a limited extent, is also using services of agencies and attorneys-at-law offices for "out-of-court" collection of receivables.

#### c) Liquidity risk

INA Group's liquidity risk is managed by maintaining adequate reserves of liquidity and credit lines and by continuous monitoring of projected and actual cash flow and due dates for account receivables and payables.

As of 30 September 2016, INA Group had contracted and available short-term credit lines amounting to HRK 2.61 bn excluding overdrafts and trade financing credit lines established with the purpose to finance the purchase of crude oil and oil products, and contracted and available long-term credit lines amounting to HRK 3.07 bn.

#### Related party transactions

INA Group has dominant positions in Croatia in oil and gas exploration and production, oil refining and the sale of gas and petroleum products. As a result of the INA Group strategic position within the Croatian economy, a substantial portion of its business and the business of its subsidiaries is transacted with the Croatian Government, its departments and agencies, and the companies with the Republic of Croatia being their majority shareholder.

Transactions between INA, d.d. and its subsidiaries, which are related parties of the Company, have been eliminated on Group level consolidation.

During the 2016, INA Group entered into the following trading transactions with the following related parties:

INA-Group	Sales of goods	Purchase of goods
