
Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

1. IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING**1.1. Product identifier**

- Trade name: **NON OXY BENZIN RON<95 (B)**
- Chemical name: Gasoline, low boiling point gasoline, unspecified
- Index no.: 649-378-00-4
- EC no.: 289-220-8
- CAS no.: 86290-81-5
- Registration No.: 01-2119471335-39-0091
- Product code: 1002485

1.2. Relevant identified uses of the substance or mixture and uses advised against

- Relevant identified uses: **Industrial:** Manufacture of Substances, Distribution of Substances, Use as intermediate
- Uses advised against: The uses that are in the list above are relevant. Other uses are not recommended unless an assessment that proves that the related risks are controlled has been conducted before starting that use.

1.3. Details of the supplier of the safety data sheet

- Manufacturer/supplier: **INA-Industrija nafte, d.d.**

Address: Av. Većeslava Holjevcica 10
pp 555, 10002 Zagreb, HRVATSKA

Phone: 00-385-1-6450-842 / 00-385-1-6451-075 (24 h)

Fax: 00-385-1-6452-050

e-mail:

sds@ina.hr

- Responsible person:

SD & HSE

Mirela Mavrinac, B.Sc.

Tel. 00-385-1-6450-803

Hrvoje Raukar, B.Sc.

1.4. Emergency Telephone Number

- Emergency Service Telephone Number: **112**
- National Protection and Rescue Directorate** 00-385-1-3650-011
Nehajska 5, 10000 Zagreb 00-385-1-3650-084
e-mail: info@duzs.hr 00-385-1-3650-082
00-385-1-3650-083
- Medical Information Telephone Number: **00-385-1-23-48-342**

2. HAZARDS IDENTIFICATION**2.1. Classification of the substance or mixture****2.1.1. Classification according to Regulation (EC) No 1272/2008 (CLP/GHS):**

Flam. Liq. 1; H224

Skin Irrit. 2; H315

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

Asp. Tox. 1; H304
 Repr. 2; H361fd
 Muta. 1B; H340
 Carc. 1B; H350
 STOT 3; H336
 Aquatic Chronic 2; H411
 Full text of H-phrases: see section 16.

2.2. Label elements

2.2.1. Labelling according to Regulation (EC) No 1272/2008 (CLP/GHS)

Hazard pictograms:

GHS02

GHS07

GHS08

GHS09

Signal word: Danger

Hazard statements (H):	H224	Extremely flammable liquid and vapour	
	H304	May be fatal if swallowed and enters airways.	
	H315	Causes skin irritation	
	H336	May cause drowsiness or dizziness.	
	H340	May cause genetic defects	
	H350	May cause cancer	
	H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.	
	H411	Toxic to aquatic life with long lasting effects.	
	Precautionary statements (P):	P101	If medical advice is needed, have product container or label at hand.
		P102	Keep out of reach of children.
P201		Obtain special instructions before use	
P210		Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.	
P273		Avoid release to the environment.	
P280		Wear protective gloves/protective clothing/eye protection/face protection.	
P301+310		IF SWALLOWED: Immediately call a POISON CENTER/doctor.	
P331	Do NOT induce vomiting.		

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

P403+ 233 Store in a well-ventilated place. Keep container tightly closed.

2.3. Other hazards

Vapours form flammable mixtures with air and explosive. Vapours are heavier than air: they can accumulate in confined spaces or in depressions, are spread at the soil and can pose risks of fire and explosion at a distance. In some circumstances, the product can accumulate static electricity in significant amounts, with the risk of shocks that may cause fire or explosions.

3. COMPOSITION / INFORMATION ON INGREDIENTS

- Substance:	X				Mixture:	
- Components contributing to product hazardoussness:						
Substance name	Substance identification			[%]	Classification according to Regulation (EC) No 1272/2008 (CLP/GHS)	
	CAS no.	EC no.	Registration no. (REACH)			
Gasoline	86290-81-5	289-220-8	01-2119471335-39-0091	≤ 100	Carc. 1B; H350 Muta. 1B; H340 Asp. Tox. 1; H304	
Benzene ⁽¹⁾	71-43-2	200-753-7	-	1 - 5	Flam. Liq. 2; H225 Carc. 1A; H350 Muta. 1B; H340 STOT RE 1; H372 Asp. Tox. 1; H304 Eye Irrit. 2; H319 Skin Irrit. 2; H315	
Toluene ⁽¹⁾	108-88-3	203-625-9	-	> 1	Flam. Liq. 2 H225 Repr. 2; H361d Asp. Tox. 1; H304 STOT RE 2 *H373 Skin Irrit. 2; H315 STOT SE 3; H336	
n-hexane ⁽¹⁾	110-54-3	203-777-6	-	> 0,1	Flam. Liq. 2; H225 Repr. 2; H361f Asp. Tox. 1; H304 STOT RE 2 *; H373 Skin Irrit. 2; H315 STOT SE 3; H336 Aquatic Chronic 2; H411	

⁽¹⁾ These components were not added on purpose but they are reported as important for classification

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

4. FIRST AID MEASURES

4.1 Description of first aid measures

- general information: In case of ingestion, always assume aspiration into the lungs has occurred, accompanied by the pulmonary oedema hazard. Show the label on the packaging or the SDS.
- after inhalation: Remove the person from dangerous area to fresh air.
In case of headache, dizziness, nausea and permanent complaints immediately seek medical attention.
In case of fainting transport in lateral position to hospital, paying attention to the free passing of the air thorough the respiratory tract.
In case of difficulty in breathing or respiratory arrest, open airways, initiate resuscitation (heart massage and artificial respiration) and immediately seek medical attention.
- after skin contact: Take off the contaminated clothes and footwear. Thoroughly rinse the afflicted skin surface with water and soap for 10 - 15 minutes. In case of redness, immediately seek medical advice.
- after eye contact: Remove contact lenses (if present) and flush the eyes with running water for at least 15 minutes. In case of irritation, blurred vision and swelling immediately seek medical attention.
- after ingestion: DO NOT invoke vomiting! Do not give anything by mouth! Always assume aspiration into the lungs has occurred. If vomiting occurs, keep the head below the level of hips in order to prevent penetration into the lungs. Immediately seek medical attention.

4.2 Most important symptoms and effects, both acute and delayed

- after inhalation: May cause drowsiness or dizziness.
- after skin contact: Redness, dermatitis.
- after eye contact: May cause slight eye irritation.
- after ingestion: It can cause nausea or headache. May cause lung damage if swallowed. Danger of pulmonary oedema due to aspiration in the lungs.

4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically. Only qualified medical personnel should administer oxygen.

5. FIREFIGHTING MEASURES

5.1 Extinguishing media

- SUITABLE: Heavy air foam (foam resistant to alcohols and polar solvents), dry powder, CO₂, water mist. When using dry powder and CO₂ (for initial fires, minor fires and indoor fires) attention is to be paid to the hazard of possible repeated flaring up of the fire after extinguishing.
- UNSUITABLE: Water jet (danger of spreading the fire).

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

- Firefighting measures for special hazards:** Remove all ignition sources and, if necessary, call firemen and the police. Special care should be taken of the fact that there is a permanent danger of creation of explosive mixture with the air at room temperature.
- Special firefighting measures:** Use water mist and water spray for cooling the surfaces exposed to heat and for protection of people. Only those who are trained in fire protection may use water spray (dispersed water).
- Special fire fighter protective equipment:** Self-sustained open-circuit compressed-air breathing apparatus (HRN EN 137). Wear protective clothing for firefighters (intervention suit) in accordance with HRN EN 469.
- 5.2 Special hazards arising from the substance or mixture:** Highly flammable. Danger of explosion. Vapours, being heavier than air, stay close to the ground and in recesses.
- 5.3 Advice for firefighters:** No data available.

6. ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures:** Rooms at risk must be thoroughly vented. Exhibit a sign of prohibited entry and work with open flame and sparking devices on a visible location. Measure the concentration of gasoline vapours in the air, in line with regulations. Take measures against static electricity occurrence. Provide electrical conductivity by connecting and grounding of all equipment. Control area by flammable gases detector. Do not use electric equipment. Do not inhale vapours, evaporation.
Do not smoke. Stand upwind from the spill site. Use personal protection equipment listed in Section 8.
- 6.2 Environmental precautions:** Define the risk area and prevent discharging and spilling into watercourses, canals, drainage systems and soil by digging out a protective ditch, fencing it with bags filled with dry sand, earth or clay. Provide good ventilation of the area. In case of major leaks notify the Emergency Service by dialling 112.

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

6.3 Methods for cleaning-up and recovery:

Use safety-type pump for reloading from the damaged tank into an empty tank / tank truck / tank car. Remove remainder from the ground using adsorption agents (sawdust, mineral adsorbents, and other inert materials). Place the waste material and removed contaminated surface soil level into well-closed tanks to be stored in well-vented rooms until disposal to be done by legal entities for disposal of hazardous waste, authorized by the Ministry in charge of environmental protection.

In case of gasoline spill in working area, the fluid must be removed and the surface washed with soapy water and then rinsed with clean water.

- Additional warnings:

Highly inflammable fluid and vapours! Stand upwind with respect to release point.

6.4 Reference to other sections:

See items 8 and 13.

7. HANDLING AND STORAGE

- Handling

7.1 Precautions for safe handling:

7.1.1 Safe handling advice:

Keep far from heat sources and eliminate immediately all ignition sources. Re-loading i.e. unloading/loading shall be performed at the sites designed for the purpose, ensuring the air ventilation/outlet. Use the equipment and devices in good working order. Do not use sparking tools.

Work room/area and storage area shall be provided with impermeable floor, resistant to solvents. Floors in rooms endangered by explosive atmosphere shall have transitional resistance of <math><1\text{ M}\Omega</math> within the system for bypassing the static electricity.

Equipment shall be grounded and appropriate protective measures shall be taken against static electricity: grounding, air ionization, use of antistatic material, maintaining air humidity above 65%, bypassing the static electricity through electric influence.

7.1.2 Advice on general occupational hygiene:

Prohibited smoking, eating, drinking during the work, as well as keeping food in areas where the product is handled. Personal clothes shall be kept separately from the work clothes and workplace. Obligatory wearing of the prescribed work clothes, rubber boots, protective gloves and goggles. Extremely dirty, soaked or torn clothes must be immediately changed. Strictly avoid contact with skin and eyes.

7.2 Conditions for safe storage, including any incompatibilities

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

- SUITABLE: Store in well-sealed tanks, properly manufactured and equipped. Provide room/area ventilation and appropriate temperature. Take measures against the static electricity charge. Make sure that receiving tank farms are below self-supporting tanks.

- TO BE AVOIDED: Storage in the same room/area with other chemicals, particularly those that may cause fire. Use of sparking tools or devices/equipment that may produce sparks in storage area.

- Packaging materials

- RECOMMENDED: Original as made by the tank/container manufacturer with valid certification.

- NOT SUITABLE: Any other.

7.3 Specific end use(s): No data available.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1. Control parameters

Hazardous substance (CAS No.)	Occupational exposure limit values/short term values (OEL/STEL)		Biological limit values
	ppm	mg/m ³	
Gasoline, low boiling point gasoline - unspecified (86290-81-5)	300/500	-/-	no data
benzene (71-43-2)	1/-	3,25/-	28 µg /L (0,36 µmol/L) – blood immediately at the end of work shift 46 µg/g creatinine* (21,7 µmol/mol creatinine*) – urine at the end of work shift
n-hexane (110-54-3)	20/-	72/-	150 µg/L (1,74 µmol/L) – blood during exposure 1,66 µmol/L (40 ppm) – in extremely exhaled air during exposure

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

toluene (108-88-3)	50/192	100/384	1,0 mg/L (10,85 µmol/L) – blood immediately at the end of work shift 0,83 µmol/L (20 ppm) – in extremely exhaled air during exposure
-----------------------	--------	---------	--

- Monitoring procedures:

8.2. Exposure controls

- Summary of risk management measures: Measurement of benzene vapours concentration in the air, in line with regulations.

8.2.1 Occupational exposure controls

- Description of operating procedure and technological control: Make sure work areas are well-ventilated. Provide a decontamination sprayer for the eyes and face. Adopt personal hygiene measures: wash the hands after contact with the fuel, especially before eating, drinking and/or smoking. Regularly maintain and wash the clothing and equipment after use to remove dirt. Properly dispose of the contaminated clothing and equipment. Maintain cleanliness in accordance with good practice. Educate the employees on the hazards and control measures. Test and maintain the equipment used when handling the fuel: for example, personal protective equipment, and ventilation system. Do not swallow. If swallowed, seek medical attention.

8.2.2 Personal protective equipment Personal protective equipment shall comply with national regulations and international standards.

- respiratory tract protection: In concentrations exceeding 300 ppm obligatory wearing of protective masks for the whole face (HRN EN 136) with filter 'A' (HRN EN 14387).

Use self - sustained open-circuit compressed - air breathing apparatus (HRN EN 137) in case of high concentrations, if oxygen concentration is below approved level and in closed spaces.

- hand protection: Protective gloves of resistant and impermeable material. At full contact gloves of nitrile rubber 0,40 mm thick, at contact with drops gloves of nitrile rubber 0,11 mm thick (HRN EN 374).

- eye protection: Protective goggles or guard (HRN EN 166) at lower concentrations, protective shields at higher concentrations.

- skin and body protection: Use chemical resistant gloves, antistatic clothing and apron (where there is a risk of splashing).

- Special hygienic and safety precautions: Maintaining regular stipulated hygiene for work with hazardous substances. Take off the contaminated clothes and footwear. Equipment and devices shall be regularly inspected and maintained with running water.

When handling this product, smoking, eating and drinking are prohibited. After each interruption of work, washing of hands is obligatory.

8.2.3 Environmental exposure controls

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

- **Summary of risk management measures:** No data available.

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

- state:		liquid
- colour:		colourless
- odour:		characteristic of gasoline
- odour threshold:		No data available.
- pH value (indicate conc. and temp.):		Not applicable.
- Melting point/freezing point:	°C	No data.
- boiling point/boiling range:	°C	30-210
- flash point:	°C	<0 (from literature)
- Evaporation rate:		No data.
- flammability (solid, gas):		Need to be heated to ignite.
- explosive limits:	vol. %	0,6 - 8 (from literature)
- vapour pressure :	kPa	45 – 60 (May 1 st – September 30 th) 60 – 80 (November 1 st – March 31 st)
- vapour density at 15°C:	kg/m ³	No data.
- relative density:		No data.
- density at 15°C:	kg/m ³	720,0 – 775,0
- solubility (indicate solvent):	g/L	No data.
- Solubility in water:	g/L	Insoluble.
- partition coefficient n-octanol / water	logPow	Not applicable.
- auto ignition temperature:	°C	280 - 470 (from literature)
- disintegration temperature:	°C	No data.
- viscosity (kinematic) at 40°C:	mm ² /s	No data.
- oxidizing properties:		Not applicable.
- conductivity:	pS/m	No data.
9.2 Other information:		No data.

10. STABILITY AND REACTIVITY

10.1 Reactivity:	Stable when the prescribed storage and use requirements are met.
10.2 Chemical stability:	Stable when the prescribed storage and use requirements are met.
10.3 Possibility of hazardous reactions:	No potentially hazardous reactions known.
10.4 Conditions to avoid:	Keep away from heat, open flame, sparks.
10.5 Incompatible materials:	Halogens, strong acids, bases and strong oxidants.

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

10.6 Hazardous decomposition products: None in standard operating conditions and in proper storage; however thermal decomposition may generate harmful gases, including carbon-monoxide (CO).

11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects:

- Acute toxicity

- oral (LD₅₀): > 5000 mg/kg body weight (rat)
- inhalation (LC₅₀): > 5610 mg/m³ air (analytically) (rat)
- dermal (LD₅₀): > 2000 mg/kg body weight (rabbit)

- Irritation/Corrosion

- skin: Redness, dermatitis (H315).
- eyes: No data available.
- respiratory tract: May cause lung damage if ingested.

- Sensitisation

- skin: No data available.
- respiratory tract: No data available.

- **Aspiration hazard:** May be fatal if swallowed and enters airways. (H304).

- **Other classic effects: (e.g. unconsciousness, particularly toxic metabolites, etc.):** May cause drowsiness or dizziness (H336).

- **Permanent effects due to acute or chronic exposure:** No data available.

- Special effects

- mutagenicity: May cause heritable genetic damage (H340).
- carcinogenicity: May cause cancer (H350).
- fertility decrease: No data available.
- harmful effect on unborn child: No data available.
- toxicity to reproduction: Suspected of damaging fertility. (H361fd).
- other (e.g. endocrine disruptors): No data available.
- STOT (SE): May cause drowsiness or dizziness (H336).
- STOT (RE): No data available.

- **Prohibitions and restrictions:** No data available.

- **Other:** No data available.

12. ECOLOGICAL INFORMATION

12.1. Toxicity

- to aquatic organisms: EL₅₀=4,5 mg/l (Daphnia magna), EL₅₀=3,1 mg/l (algae), LL₅₀=8,2 mg/l (fish)

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

- to ground organisms: No data available.

- to plants and land animals: No data available.

12.2. Persistence and degradability

- biodegradation: Not easily biodegradable.

- other degradation processes: No data available.

- degradation in wastewater: Insoluble in water. Forms surface film that quickly evaporates, but if large quantities are spilled, may have harmful effect on aquatic organisms due to lack of oxygen.

12.3. Bioaccumulative potential

- bio-concentration factor (BCF): No data available.

12.4. Mobility in soil

Method: No data available.

- Known or predicted distribution in environmental compartments: No data available.

- surface tension: No data available.

- absorption/desorption: No data available.

- other physical and chemical properties: See item 9.

12.5. Results of PBT and vPvB assessment

- data from chemical safety report: Product does not fulfil PBT and vPvB criteria for classification defined by Annex XIII of REACH Regulation.

12.6. Other adverse effects: See item 9.

13. DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods: Waste shall be handed over to the person authorised for waste collection, disposal or recovery. If possible, the waste shall be recovered.

- **Waste codes:** 13 07 02*

- **Waste from residues:** There is no classic waste from this product except in case of unintentional release. For such cases see Section 6.

- **Contaminated packaging:** Not applicable.

- **Relevant provisions:** Act on sustainable waste management, Ordinance on Waste Catalogue, Ordinance on waste management.

14. TRANSPORT INFORMATION

14.1 UN number: 1203

14.2 UN proper shipping name: GASOLINE or PETROL

14.3 Transport hazard class(es)

ADR/RID/ADN/ICAO/IATA: 3

IMDG: 3

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

14.4 Packing group

ADR/RID/ADN/IMDG/ICAO/IATA: II

14.5 Environmental hazards

ADR, RID, ADN, ICAO/IATA: Toxic to aquatic life with long lasting effects.
IMDG: Maritime pollutant

14.6 Special precautions for user

ADR

Transport category: 2
Vehicle for tank carriage: FL
Tank code: LGBF
Tunnel restriction code: (D/E)
Label: 3
Classification code: F1
Hazard identification: 33
Special provisions: 243, 534, 363, 664, TU9, S2, S20.

ADN

Label: 3
Additional requirements/Remarks: 14
Dangers: 3+N2+CMR+F
Equipment required: PP, EP, EX, TOX, A.
Classification code: F1
Carriage permitted: yes
Type of tank vessel: N/2
Anti-explosion protection required: yes
Maximum degree of filling in %: 97

ICAO

Label: 3
Cargo IMP code: 3H
Passenger and cargo aircraft: yes
Cargo aircraft only: 60L
ERG code: E2

14.7 Transport in bulk condition according to MARPOL Convention, Annex II and IBC Codex

Trade name:	Not applicable.
Pollution category (according to MARPOL, Annex II):	Not applicable.
Vessel type (according to IBC Code):	Not applicable.
Special and operative requirements (according to IBC Code):	Not applicable.

RID

Transport category: 2
Tank code: LGBF
Label: 3
Classification code: F1
Hazard identification: 33
Special provisions: 243, 534, TU9.

IMDG

Subsidiary risk: maritime pollutant
Group of the cargo: E
Special provisions: 243, 363, TP1.
EmS: F-E, S-E
Segregation group: E

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

1. MANUFACTURE OF NON OXY GASOLINE RON <95 (B) - INDUSTRIAL

Section 1 Exposure Scenario Title Gasoline, Low boiling point – unspecified that is classified as H350 and/or H340 and/or H361; (containing 1% to 5% benzene)	
Title	
Manufacture of substances	
Use Descriptor	
Sector(s) of Use	3, 8, 9
Process Categories	1, 2, 3, 8a, 8b, 15 Further information on the mapping and allocation of PROC codes is contained in Table 9.1
Environmental Release Categories	1
Specific Environmental Release Category	ESVOC SpERC 1.1.v1
Processes, tasks, activities covered	
Manufacture of the substance or use as a process chemical within closed systems. Includes material transfers, storage, sampling, associated laboratory activities, maintenance and loading (including marine vessel/barge, road/rail car and bulk container).	
Assessment Method	
See Section 3.	
Section 2 Operational conditions and risk management measures	
Section 2.1 Control of worker exposure	
Product characteristics	
Physical form of product	Liquid, vapour pressure > 10 kPa at STP OC5
Concentration of substance in product	Covers percentage substance in the product up to 100 % (unless stated differently) G13
Amount used	Not applicable
Frequency and duration of use/exposure	Covers daily exposures up to 8 hours (unless stated differently) G2
Human factors not influenced by risk management	Not applicable
Other Operational Conditions affecting exposure	Operation is carried out at elevated temperature (> 20°C above ambient temperature). OC7 . Assumes a good basic standard of occupational hygiene is implemented G1 .
Contributing Scenarios	Specific Risk Management Measures and Operating Conditions
General Measures (skin irritants). G19 .	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin effects that may develop. E3

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

General Measures (carcinogens). G18.	<p>Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general / local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean / flush equipment, where possible, prior to maintenance.</p> <p>Where there is potential for exposure: Restrict access to authorised staff; provide specific activity training to operators to minimise exposures; wear suitable gloves (tested to EN374) and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely.</p> <p>Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance. G20.</p>
CS15 General exposures (closed systems). + CS56 With sample collection.	<p>Handle substance within closed systems. E47. Sample via a closed loop or other system intended to avoid exposure. E8. Wear suitable gloves tested to EN374. PPE15.</p>
CS15 General exposures (closed systems). + CS54 Continuous process.	<p>Ensure extraction ventilation on locations where exposure is possible. E54. Handle substance within a closed system. E47.</p>
CS15 General exposures (closed systems). + CS55 Batch process.	<p>Handle substance within a closed system. E47. Ensure operation is undertaken outdoors. E69.</p>
CS36 Laboratory activities	<p>Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure. E12.</p>
CS14 Bulk transfers	<p>Ensure material transfers are under containment or extract ventilation. E66.</p>
CS39 Equipment cleaning and maintenance	<p>Drain down and flush system prior to equipment break-in or maintenance. E55. Retain drain downs in sealed storage pending disposal or for subsequent recycle. ENV4. Clear spills immediately. C&H13. Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. PPE16.</p>
and maintenance	<p>E55. Retain drain downs in sealed storage pending disposal or for subsequent recycle. ENV4. Clear spills immediately. C&H13. Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. PPE16.</p>
CS67 Storage.	<p>Store substance within a closed system. E84 Wear protective gloves in accordance to EN374. PPE15.</p>
Additional information on the basis for the allocation of the identified OCs and RMMs is contained in Appendices 1 to 3	
Section 2.2 Control of environmental exposure	
Product characteristics	
Substance is complex UVCB [PrC3]. Predominantly hydrophobic [PrC4a].	
Frequency and duration of use	
Continuous release [FD2].	
Emission days (days/year)	300
Environmental factors not influenced by risk management	
Local freshwater dilution factor	10
Local marine water dilution factor	100
Other given operational conditions affecting environmental exposure	

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

Release fraction to air from process (initial release prior to RMM)	0,025
Release fraction to wastewater from process (initial release prior to RMM)	0.000019
Release fraction to soil from process (initial release prior to RMM)	0,0001
Technical conditions and measures at process level (source) to prevent release	
Common practices vary across sites thus conservative process release estimates used [TCS1].	
Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil	
Risk from environmental exposure is driven by freshwater sediment. [TCR1b] Prevent discharge of undissolved substance to or recover from wastewater [TCR14]. Risk from environmental exposure is driven by humans via indirect exposure (primarily inhalation) [TCR1k]. If discharging to domestic sewage treatment plant, no onsite wastewater treatment required [TCR9].	
Treat air emission to provide a typical removal efficiency of (%)	70
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency \geq (%)	4.4
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of \geq (%)	0
Organisation measures to prevent/limit release from site	
Do not apply industrial sludge to natural soils [OMS2]. Sludge should be incinerated, contained or reclaimed [OMS3]. Not applicable as there is no release to wastewater. [STP1]	
Conditions and measures related to municipal sewage treatment plant	
Estimated substance removal from wastewater via domestic sewage treatment (%)	96.1
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	96.1
Maximum allowable site tonnage (M_{Safe}) (kg/d)	18395674,09
Assumed domestic sewage treatment plant flow (m^3/d)	10000
Conditions and measures related to external treatment of waste for disposal	
During manufacturing no waste of the substance is generated. [ETW4]	
Conditions and measures related to external recovery of waste	
During manufacturing no waste of the substance is generated. [ERW2]	
Additional information on the basis for the allocation of the identified OCs and RMMs is contained in Petrorisk file	
Section 3 Exposure Estimation	
3.1. Health	
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated. G21.	
3.2. Environment	
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model [EE2].	

Product

NON OXY GASOLINE RON <95 (B)

Date: 2019/11/5

Edition: 1

Section 4 Guidance to check compliance with the Exposure Scenario

4.1. Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. **G22.**

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. **G23.**

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. **G32.** Available hazard data do not support the need for a DNEL to be established for other health effects. **G36.** Risk Management Measures are based on qualitative risk characterisation. **G37.**

4.2. Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures [DSU1]. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination [DSU2]. Required removal efficiency for air can be achieved using onsite technologies, either alone or in combination [DSU3]. Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>) [DSU4].

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

2. DISTRIBUTION OF NON OXY GASOLINE RON <95 - INDUSTRIAL

Section 1 Exposure Scenario Title Gasoline, Low boiling point – unspecified that is classified as H340 and/or H350 and/or H361; (containing 1% to 5% benzene)	
Title	
01a - Distribution of substance (classified as H340 and/or H350 and/or H361; (containing 0% to 1% benzene))	
Use Descriptor	
Sector(s) of Use	
Process Categories	1, 2, 3, 8a, 8b, 15
Environmental Release Categories	4, 5, 6a, 6b, 6c, 6d, 7
Specific Environmental Release Category	ESVOC SpERC 1.1b.v1
Processes, tasks, activities covered	
Bulk loading (including marine vessel/barge, rail/road car and IBC loading) and repacking (including drums and small packs) of substance, including its sampling, storage, unloading, and associated laboratory activities. Excludes emissions during transport.	
Assessment Method	
See Section 3.	
Section 2 Operational conditions and risk management measures	
Section 2.1 Control of worker exposure	
Product characteristics	
Physical form of product	Liquid
Vapour pressure	Liquid, vapour pressure > 10 kPa at STP OC5.
Concentration of substance in product	Covers percentage substance in the product up to 100 % (unless stated differently) G13.
Frequency and duration of use/exposure	Covers daily exposures up to 8 hours (unless stated differently) G2.
Other Operational Conditions affecting exposure	Assumes use at not more than 20°C above ambient temperature, unless stated differently. G15. Assumes a good basic standard of occupational hygiene is implemented G1.
Contributing Scenarios	
Specific Risk Management Measures and Operating Conditions	
General Measures (skin irritants). G19.	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin effects that may develop. E3
General Measures (carcinogens). G18.	Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general / local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean / flush equipment, where possible, prior to maintenance. Where there is potential for exposure: Restrict access to authorised staff; provide specific activity training to operators to minimise exposures; wear suitable gloves (tested to EN374) and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance. G20.

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

CS15 General exposures (closed systems). + CS56 With sample collection.	Handle substance within closed systems. E47. Sample via a closed loop or other system intended to avoid exposure. E8. Wear suitable gloves tested to EN374. PPE15.
CS15 General exposures (closed systems). OC9 Outdoor.	Handle substance within closed systems. E47.
CS2 Process sampling	Sample via a closed loop or other system to avoid exposure. E8.
CS36 Laboratory activities.	Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure. E12.
CS501 Bulk closed loading and unloading.	Ensure material transfers are under containment or extract ventilation. E66.
CS39 Equipment cleaning and maintenance	Drain down and flush system prior to equipment break-in or maintenance. E55. Retain drain downs in sealed storage pending disposal or for subsequent recycle. ENVT4. Clear spills immediately. C&H13. Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. PPE16.
CS67 Storage.	Ensure operation is undertaken outdoors. E69. Store substance within a closed system. E84.
Section 2.2 Control of environmental exposure	
Product characteristics	
Substance is complex UVCB. [PrC3] Predominantly hydrophobic. [PrC4a]	
Amounts used	
Fraction of EU tonnage used in region	0,1
Regional use tonnage (tonnes/year)	11 000 000
Fraction of Regional tonnage used locally	0,002
Annual site tonnage (tonnes/year)	21 000
Maximum daily site tonnage (kg/day)	71 000
Frequency and duration of use	
Continuous release. [FD2]	
Emission days (days/year)	300
Environmental factors not influenced by risk management	
Local freshwater dilution factor	10
Local marine water dilution factor	100
Other given operational conditions affecting environmental exposure	
Release fraction to air from process (initial release prior to RMM)	0,001
Release fraction to wastewater from process (initial release prior to RMM)	0.000001
Release fraction to soil from process (initial release prior to RMM)	0.00001
Technical conditions and measures at process level (source) to prevent release	
Common practices vary across sites thus conservative process release estimates used. [TCS1]	
Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil	
Risk from environmental exposure is driven by freshwater. [TCR1a]	
No wastewater treatment required [TCR6]	
Treat air emission to provide a typical removal efficiency of (%)	90
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency >= (%)	0,0
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of >= (%)	0,0
Organisation measures to prevent/limit release from site	

Product	NON OXY GASOLINE RON <95 (B)	Date:	2019/11/5
		Edition:	1

Do not apply industrial sludge to natural soils. [OMS2] Sludge should be incinerated, contained or reclaimed. [OMS3]	
Conditions and measures related to municipal sewage treatment plant	
Estimated substance removal from wastewater via domestic sewage treatment (%)	96,1
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	96,1
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (tonnes/d)	2600
Assumed domestic sewage treatment plant flow (m ³ /d)	2000
Conditions and measures related to external treatment of waste for disposal	
External treatment and disposal of waste should comply with applicable local and/or national regulations. [ETW3]	
Conditions and measures related to external recovery of waste	
External recovery and recycling of waste should comply with applicable local and/or national regulations. [ERW1]	
Section 3 Exposure Estimation	
3.1. Health	
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated. G21.	
3.2. Environment	
The Hydrocarbon Block Method has been used to calculate environmental exposure with the PETRORISK model. [EE2]	
Section 4 Guidance to check compliance with the Exposure Scenario	
4.1. Health	
Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. G22.
